## 2.4GHz BULLET WFP0200503

Made for laptop & wireless PDA's including for mobile & body worn applications. A diverse antenna with a nearly spherical pattern allowing change of position yet maintaining signal. This antenna is ideal for handheld & close-to-body deployments. Can be connected to any PCMCIA/PC or USB wireless card that allows an external connection with appropriate pigtail.

All WiFi-Plus antennas provide obstruction penetrating qualities.
